16+

years in software, from banking systems to modern frontend

7+

years shipping production React and Next.js

NYT

featured REAL Evals, where I built the app clones

PROFILE

Frontend engineer who owns **the interface layer**: component systems, performance, and accessibility, working closely with product and design. Fully remote since 2021, shipping products for international teams, from youth sports leagues to AI creation tools.

EXPERIENCE

Senior Frontend Engineer · Bonzzu

Feb 2022 – Present · Remote · Clients: RCX Sports, Delos

- Built **RCX Sports'** public League Finder for NFL FLAG, Jr. NBA/WNBA, NHL Street, and MLS GO, plus the League Central operator platform
- Designed reusable component systems and led performance work (SSR, code splitting)
- Integrated Contentful CMS so non-technical teams publish content on their own

Frontend Engineer · Freelance

Jan 2019 – Present · Remote

- **Magic Hour**: building frontend features for AI image and video tools · Next.js, TypeScript
- **REAL Evals**: built high-fidelity clones of Gmail, DoorDash, Uber, and United Airlines used to evaluate AI agents; featured by The New York Times · Next.js, Material UI, Redux
- **FactuPro**: built a production invoicing SaaS for clients in Spain · Next.js, Tailwind CSS
- Built a payment portal (**Vrio**) and storefront interfaces (**Wpromote**) · React, TypeScript

Full Stack Engineer · Nisum

Aug 2021 – Apr 2022 · Remote · Client: Science 37

- Built React / Redux interfaces and Storybook components for a clinical research platform

Senior Mainframe COBOL Developer · ICBC

Feb 2015 – Aug 2021 · Buenos Aires

COBOL Developer · BBVA via ISBAN / Accenture

Mar 2010 – Jan 2015 · Buenos Aires

- Banking systems that couldn't go down, including Anti-Money Laundering work under strict SLAs. It's why I design for edge cases and failure states.

SKILLS

Core	React, Next.js, TypeScript, JavaScript, HTML, CSS
